

## NUTRITIONAL INFORMATION - 5.13.2019

The nutritional information below is derived from information provided by our suppliers, analysis using industry standard software and published resources, including those from the U.S.D.A. All nutritional information given is based on standard recipes and serving sizes and does not account for customized orders. We have made every effort to ensure that the nutritional and allergen information provided below is accurate. However, because of the handcrafted nature of our menu items, the variety of procedures and product assembly used in our kitchens, shared cooking and preparation areas including common fryer oil, reliance on our suppliers, and regional and seasonal differences in ingredients, we are unable to make any guarantees to its accuracy, and disclaim liability for its use. The material below is provided for informational purposes only and is not meant as a substitute for advice provided by a healthcare professional.

The Dietary Guidelines for Americans recommend limiting saturated fat to 20 grams and sodium to 2,300 milligrams for a typical adult eating 2,000 calories daily. Recommended limits may be higher or lower depending upon daily calorie consumption. A 2,000 calorie daily diet is used as the basis for general nutrition advice. However, individual caloric needs may vary.
